Re: Feldhaus-Schwartz Co. Olds-Honda

Dear Mr. Brady;

Thanks very much for your assistance in preparing my final annual report to be filed with the Kentucky EPA. In walking through this process I am reminded of the very professional way you have served my business in the environmental area these past years. I note that the buyer of my business has continued to engage your services. I would like for you to use me as a reference for any new business you may be working on and any prospect can feel free to call me for the details of my experience with you.

You will recall that while you had taken care of our collsion repair shop needs for some time my repair shop manager had used a different provider which resulted in an investigation and citation for several EPA violations. With your expertise we corrected all violations, acquired necessary new equipment, established operating procedures satisfactory to the investigator to the end that we were relieved of all fines and placed in good standing.

I like the way you do business. Your equipment is the very best. You have good people and they are prompt and efficient. I appreciate the fact that you accomplish the environmental regulatory requirements with the minimum of interference with our primary business functions on the most economical basis. I also appreciate your ability to work well with the regulators and that you have a good working relationship with them which simply means cost savings. The same applies to the various receiving facilities that you utilize on our behalf. Finally may I say that, based on the foregoing, and a review from time to time of the services and costs of other providers by our consultant we found you to consistently provide the lowest cost of service in the area.

Sincerely, 
William Feldhaus, February 13, 1997
